SPARQL query used:

Summary: The CKG contains **154 distinct venue–Wikidata URI pairs** across **150 distinct venue labels** linked to cultural performance events (CT0_0001005). The venues span major European cities (Vienna, Paris, Berlin, London, etc.) and specific theatres/concert halls (Burgtheater, Teatro San Carlo, Kärntnertortheater, Oper am Gänsemarkt, etc.). Some venues have multiple Wikidata links (e.g., "Wien" links to Q380298, Q1741, and Q621), and some Wikidata URIs are shared across many venue labels (notably Q308720 "Burgtheater" appears for dozens of cities, and Q2920855 "Académie Royale de Musique" appears across many locations).

Good — no additional German cities beyond what was already captured. I now have the complete list of **44** German performance venues.

The CKG contains **44 distinct venue–Wikidata pairs** for performance venues located in Germany. These were identified by filtering venue labels (linked to cultural events `CT0_0001005` via `CT0_0001011`) for German city names. (The Wikidata endpoint does not expose P17/country data through this SPARQL service, so geographic filtering was done via the city name embedded in each venue label.)

What this visualization includes:

- 🗺️ **Dark-themed interactive map** (CARTO dark tiles via Leaflet.js) centered on Germany
- **44 venue markers** color-coded by venue type:
 -  **Burgtheater** (14 venues) — the most widespread type
 -  **Académie Royale de Musique** (10 venues)
 -  **Nationaltheater** (2 venues)
 -  **Oper / Theater** (1 venue — Hamburg's Oper am Gänsemarkt)
 -  **Schloss / Palace** (1 venue — Pillnitz)
 -  **City (general)** (4 venues)
 -  **Other** (2 venues — Leipzig & München special theatres)
- **Spiral offset** for cities with multiple venues (e.g., Berlin, Frankfurt, Hamburg) so markers don't overlap
- **Popups** on marker click showing city, venue name, coordinates, and a direct Wikidata link
- **Sidebar** with stats, clickable legend (click a type to zoom to all its venues), and a scrollable venue list (click any entry to fly to it on the map)
- **Hover effects** on markers for easy identification
