All 7 RISM sources attributed to Carolan were found via the **CT0_0001009** property linking sources to his person node:

Key SPARQL query used:

Notes:

- The RISM data resides in the **<https://nfdi4culture.de/graph>** graph (not the **linkedmusic.ca/graphs/*** graphs, which appear to be empty at this time).
- The property **CT0_0001009** is the sole predicate linking RISM sources to Carolan as a person.
- Notable among the results is source 1001039417 — a Beethoven manuscript copy of "The Elfin Fairies" (one of Carolan's compositions), showing how Carolan's music was transmitted and reworked by later composers.
- No Carolan works were found in other subgraphs (MusicBrainz, The Session, CantusDB, DIAMM, etc.) as those graphs appear to have no current data in the endpoint.
